**DETAILED ACTION*****Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

Claims 1-5 are rejected under 35 U.S.C. 103(a) as being unpatentable over Marks in view of Moore.

Marks disclose a container assembly having a front partially transparent label (12) having graphics and a rear label (14) located directly underneath said front label with complimentary graphics thereon. Marks lack the disclosure of complimentary graphics located on the container surface directly underneath said front label. Moore teaches that it is well known in the art to use complimentary graphics (13) on a container wall. It would have been obvious to one having ordinary skill in the art at the

time the invention was made to replace the rear label of Marks with complimentary graphics located on the container surface directly underneath said front label in the manner as taught by Moore to reduce the cost of the assembly.

In regard to claims 3 and 4 Official Notice is taken of the use of pressure sensitive acrylic adhesive and a substrate of polypropylene. It would have been obvious to one having ordinary skill in the art at the time the invention was made to use these claimed features since the use of such is old and well known in the art. Further there would appear to be no inventive advantage by the use of such.

In regard to claim 5, it would have been an obvious matter of design choice to one having ordinary skill in the art at the time the invention was made to form the assembly such that the claimed removal force is needed, since applicant has not disclosed that this solves any stated problem or is for any particular purpose. Further the graphics adhered to the wall would inherently remain intact once the label is removed.

#### ***Response to Arguments***

Applicant's arguments filed 2/25/05 have been fully considered but they are not persuasive.

In response to applicant's argument that Marks as modified by Moore includes structure not required by applicant's invention, it must be noted that Marks as modified by Moore discloses the invention as broadly claimed and best understood. The fact that it discloses additional structure not claimed is irrelevant. In the present case a scene

comprised of complimentary graphics would be obtained from the combination of the references and it would reduce the cost of the assembly.

***Conclusion***

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
